Super-precision, high-capacity, universally matchable single row angular contact ball bearing

These super-precision, high-capacity, single row angular contact ball bearings accommodate radial and axial loads acting simultaneously, where the axial load acts in one direction only. They are designed to accommodate heavy loads at relatively high speeds under low to moderate operating temperatures. Being universally matchable, they can be used together in arrangements to provide effective load sharing, within a predetermined preload range, without the use of shims or similar devices.

- Very high running accuracy
- Very high load carrying capacity
- Relatively high speed and stiffness
- Universally matchable

Overview

Dimensions

| | |
|------------------|--------|
| Bore diameter | 80 mm |
| Outside diameter | 140 mm |
| Width | 26 mm |
| Contact angle | 15 ° |

Performance

| | |
|---------------------------|---------------------------------------|
| Basic dynamic load rating | 85.2 kN |
| Basic static load rating | 75 kN |
| Note | Contact SKF for the attainable speeds |

Properties

| | |
